1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, 6, 11, 12, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibb. Gibb discloses a flow control device including an opening part 2, a large flow rate valve 1, a sealing member 7 with 1b since 7 holds 1b in position, a valve hole 9 in the sealing member 7 as claimed with seal 7 and 1b making tight contact with 2 as claimed, a small flow rate valve 6 that controls flow through and thereby closes and adjusts the orifice 9 in element 7 as claimed even though it actually seats on the lower part of 1, and a rotary valve drive device 5.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rowell and Goehner teach other flow control devices.

4. Claims 3, 5, 7-10, 13, 15 and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
